Education

Thapar University

Bachelor of Engineering in Electrical & Computer Engineering (CGPA: **7.82**)

Patiala, Punjab

Sep. 2022 – May 2026

Kendriya Vidyalaya Armapur

Class XII (CBSE) - **96.20%**

Kanpur, UP

Mar. 2020 – Jul. 2021

Experience

Uniphar Biotech Pvt. Ltd.

Tech Intern

Chandigarh, India

Mar. 2026 – Present

- **Frontend Architecture:** Spearheaded the development of Uniphar Biotech's core enterprise website, replacing an outdated legacy system with a scalable **React** and **TypeScript** platform, improving overall application rendering speed by **40%**.
- **Modern UI/UX Design:** Engineered a responsive "Liquid Glass" user interface utilizing **Tailwind CSS** and complex global transitions, enhancing navigation efficiency and reducing user workflow completion time by **25%**.
- **Database Optimization:** Architected and integrated a robust **MongoDB** schema designed to manage and index **1000+** pharmaceutical product records, achieving sub-**100ms** query response times.

Projects

Trace - Agentic Code Analysis Agent | Python, LangGraph, OpenAI, Next.js

Nov. 2025 – Jan. 2026

- Engineered a **multi-agent AI system** using **LangGraph** and **OpenAI API** to parse complex codebases up to **50K+ LOC**, reducing manual structural code review time by **35%**.
- Built an asynchronous **Next.js UI** for human-in-the-loop code debugging, tracking system state and observability metrics to accelerate developer codebase onboarding efficiency by **40%**.

Lumen - Full Stack Medical Knowledge Assistant | Python, React, Pinecone, AWS

Feb. 2026 – Apr. 2026

- Developed a scalable **RAG application** using **Next.js**, **LangChain**, and a **Pinecone** vector database that handled **1,000+** simultaneous medical queries while reducing semantic search latency by **50%**.
- Deployed the orchestration system on **AWS** via **Docker**, integrating custom prompt engineering guardrails that achieved **95%+** response domain accuracy.

EcomHome - Multi-Vendor Platform | Spring Boot, Spring Security, PostgreSQL, AWS

May 2026 – Present

- Architected a **microservices-based marketplace** using **Spring Boot**, **React**, and **Redux** featuring decoupled customer, administrator, and seller workflows with real-time inventory synchronization.
- Implemented enterprise-grade identity security utilizing **Spring Security** with **JWT tokens**, handling **OWASP Top 10 risks**, and explicit **Role-Based Access Control (RBAC)** to enforce least-privilege policies.
- Designed relational entity mappings via **JPA/Hibernate** across cloud-deployed **PostgreSQL** databases; integrated **Stripe API** for secure transactional payment processing and deployed services on **AWS** via **Docker**.

Technical Skills

Languages: C/C++, Java, Python, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks & Libraries: Spring Boot, Spring Security, React, Next.js, Node.js, Tailwind CSS, FastAPI, PyTorch

AI & Data: OpenAI API, LangChain, LangGraph, RAG, Pinecone, Pandas, NumPy

Tools & Cloud: Git, Docker, AWS, MongoDB, PostgreSQL, MySQL, Vercel, Cursor, Postman

Coursework: DSA, OOP, DBMS, Computer Architecture, Cryptography & Network Security, Machine Learning

Leadership & Extracurriculars

ISTE Thapar

Core Member - **Media Head**

Patiala, Punjab

Oct. 2022 – May 2024

- Led **3+** major publicity initiatives for institutional chapters, expanding targeted event conversion rates by **35%** and coordinating weekly cross-functional feedback workflows for **10+** team members.

Achievements

- Attained **Specialist** status (**1400+** peak rating) on Codeforces, showcasing exceptional speed and accuracy in solving complex algorithmic challenges under strict performance thresholds.
- Solved **600+** data structures and competitive programming algorithms across LeetCode, Codeforces, and GeeksforGeeks.
